

# Customs Brokerage Services

## Cross the Border in Record Time

The United States and Canada enjoy the world's largest and most open trade relationship, which gives U.S. businesses access to a neighboring marketplace of almost 32 million consumers. Clearing shipments into the Canadian market often means regulatory and logistical hurdles that can tie up business for a customer's supply chain. That's where we come in. With our team of trade professionals by your side, your shipments will arrive at the border fully compliant with all customs requirements and preapproved for clearance into Canada to move seamlessly into our extensive network for hassle-free deliveries.

### Advantages of Our Cross-Border Services

The Purolator team of trade professionals' regulatory expertise ensures compliance with all U.S. and Canadian border clearance requirements, and our distribution network guarantees delivery to even the most remote areas. Our U.S./Canadian shipping consolidation capacity provides faster and extremely cost-efficient movement across the border. For instance, our customers can ship as many packages as needed at one clearance.

### Regulatory Compliance

Border crossing for U.S./Canadian shipping is an ever-changing world of Canadian customs regulations and requirements. That's why we have a dedicated team with direct access to both Canadian and U.S. government agencies. They can assess the impact of new mandates and regulations and find ways to take advantage of any efficiencies to be gained by searching the depths of government regulations. It's their best-in-class competence that ensures compliance at the border and end delivery without unexpected invoices for additional duties and fees.

### Customs Clearance

Purolator International has earned preferred shipper status as the result of steady compliance with both U.S. and Canadian customs requirements. We participate in government programs that provide preferred access and minimal wait times. Shipments arrive at the border precleared for entry with all fees and duties paid. Shipments benefit from the most professional and hassle-free U.S.-to-Canada shipping clearance process offered by any logistics provider.

### Documentation

Purolator maintains software and database capabilities that are compliant with both U.S. and Canadian border agency regulations. Border agencies are electronically notified about a shipment before it reaches the border, allowing shipments to be prescreened and subjected to minimal delay. All paperwork is filed on a customer's behalf – accurately and timely.

Every day, Purolator delivers more than 1,000,000 packages.

We maintain the largest dedicated air fleet and ground network, including hybrid vehicles, and more guaranteed delivery points in Canada than anyone else.

But size alone doesn't make Purolator different. We also understand that the needs of no two customers are the same.

We can design the right mix of proprietary services that will make your shipments to Canada hassle free at every point in the supply chain.
